

Peter & Caren

Ex-Operations Manager / Nurse

I joined Kleeneze in July 2005 and like most people was looking for £50 per week to top up my income. I moved in with Caren in January 2007 and started to really work the business, following the systems I had been taught both on the retail side and on the sponsoring side. We had found a fantastic way to increase our income and all we do is then share the opportunity with other people.

It was at this point that I set my goal to leave my day job and build my Kleeneze business on a full time basis. This would give me the time freedom to be my own boss and spend with Caren and our daughter Holly.

Kleeneze has enabled us to do many things that other people couldn't do. Caren took a full 12 months off work when we had Holly and I have recently spent 8 months working only three days a week in my day job.

On 1st September 2010, I worked my last day for a boss and became my own boss. How fantastic is that!! Caren works 2 days per week as a nurse so we don't have to rely on childcare or babysitters.

The Kleeneze opportunity is too good to miss, don't take our word for it. Try it for yourself!
